

AYUSH PANDA

Complete Interview Readiness Planner — TUF+ Edition
Startup & Service-Based → FAANG Ready | 180+ Companies

Start Date	Target Phase 1	Target Phase 2
July 30, 2026 (Thursday)	Interview Ready by September 2026	FAANG Ready by December 2026
DSA Sheet	Current Progress	University
TUF+ 435 + FAANG OA Pack (480)	23 / 480 (~5%)	VSSUT Burla — 5th Sem CS
CGPA	Portfolio	App
8.27 / 10	ayushdev-five.vercel.app	Interview Command Center

Phase	Month	Goal	Focus
PHASE 1	Aug 2026	Startup/Service Sprint	Basic + Arrays/BS/Hashing + Core CS
PHASE 2	Sep 2026	Interview Ready + Apply	Recursion→Trees (~230/480) + 8 Mocks
PHASE 3	Oct 2026	FAANG Foundation	BST/Heaps/Graphs + System Design
PHASE 4	Nov 2026	FAANG Advanced	DP/Tries/Strings/Maths + FAANG Apps
PHASE 5	Dec 2026	FAANG Ready	Full revision + mocks + offers

This edition uses your paid **TUF+ Basic to Advanced** sheet plus a researched **FAANG OA Gap Pack** (Blind 75 / NeetCode 150 / 2025–26 OA reports) — **480 problems total**. Track A (Sep): startup/service-ready. Track B (Dec): full sheet + OA pack + timed mocks.

1. Profile Snapshot & Competitive Edge

Your Current Strengths

- **Production-Grade Portfolio:** ShipFlow AI, Relvion AI, EdinForm, Votora — live products with real users.
- **Modern Full-Stack Stack:** Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Redis, Kafka, Docker, Socket.io.
- **Strong Academics:** 8.27 CGPA at VSSUT — clears all service-based cutoffs (TCS 6.0, Infosys 6.0, Accenture 6.5).
- **20+ Projects:** End-to-end products with auth, data models, realtime, and deployment — not tutorial clones.
- **Technical Writing:** Hashnode posts on JWT, Node.js, authentication.

Gaps to Close (This Planner Addresses)

- **DSA:** 23/480 done (TUF+ + OA pack) — need ~457 more in 5 months (~3–4/day sustainable).
- **Core CS:** OS, DBMS, CN, OOP — required for service-based HR + technical rounds.
- **System Design:** Needed for FAANG L4/L5 and senior startup roles by Dec 2026.
- **Mock Interviews:** Timed coding + behavioral practice — no substitute.
- **Application Pipeline:** Structured tracking of 50+ company applications via Interview Command Center.

2. Five-Month Roadmap Overview

MONTH 1: Jul 30 – Aug 28, 2026 — STARTUP / SERVICE SPRINT

Focus: Basic Maths/Arrays/Hashing/Strings/Recursion + Sorting + Arrays + Binary Search + Hashing (progress → ~127/480; OA pack P0 starts mid-Aug). Core CS: OS + DBMS basics. Resume polish. Apply to 15 startups. Eligible for ~35 companies after this month.

MONTH 2: Aug 29 – Sep 28, 2026 — INTERVIEW READY

Focus: Recursion PatternWise → Linked List → Bit Manipulation → Greedy → Sliding Window → Stack/Queues → Binary Trees (progress → ~230/480). Core CS: CN + OOP. 8 mock interviews. Apply to 25+ companies. Eligible for ~60+ (TCS NQT, Wipro NLTH, Infosys, Cognizant + startups).

MONTH 3: Sep 29 – Oct 28, 2026 — FAANG FOUNDATION

Focus: BST + Heaps + Graphs (progress → ~312/480). System Design basics. Amazon/Google prep. Apply Microsoft/Amazon. Timed OA drills weekly. Eligible for ~75+ companies.

MONTH 4: Oct 29 – Nov 28, 2026 — FAANG ADVANCED

Focus: DP (1D/2D/Subsequences/LIS/Strings/MCM) + Tries + Strings Advanced + Maths (progress → ~370–400/480). Intermediate SD. 12+ mocks. FAANG OA finish. Eligible for ~85+.

MONTH 5: Nov 29 – Dec 28, 2026 — FAANG READY

Focus: Finish remaining problems to 480/480 + full revision. Advanced SD. 15 mocks. Offer negotiation. Eligible for 90+ companies — complete sheet, SD-ready, mock-tested, offer-ready.

3. TUF+ Basic to Advanced — Complete Problem Schedule

457 remaining problems ÷ 5 months ≈ 91/month | ~19–20/week | ~3–4/day (Mon–Sat). TUF+ core 435 + researched FAANG OA Gap Pack 45 (Blind 75 / NeetCode / 2025–26 OA reports).

#	Topic (TUF+ Sheet Step)	Problems	Month	Week	Track
1	Basic Maths	13	M1	W1	Sep
2	Basic Arrays	4	M1	W1	Sep
3	Basic Hashing	3	M1	W1	Sep
4	Basic Strings	8	M1	W1	Sep
5	Basic Recursion	8	M1	W1	Sep
6	Sorting Algorithms	7	M1	W2	Sep
7	Arrays	30	M1	W1	Sep
8	Binary Search [Fundamentals, On Answers, 2D Arrays]	30	M1	W3	Sep
9	Hashing	8	M1	W4	Sep
10	Recursion [PatternWise]	19	M2	W5	Sep
11	Linked List [Single LL, Doubly LL]	46	M2	W6	Sep
12	Bit Manipulation	9	M2	W6	Sep
13	Greedy Algorithms	12	M2	W7	Sep
14	Sliding Window / 2 Pointer	12	M2	W8	Sep
15	Stack / Queues [Implementation, Monotonic Stack]	24	M2	W9	Sep
16	Binary Trees [Traversals, Medium and Hard Problems]	31	M2	W9	Both
17	Binary Search Trees	15	M3	W10	FAANG
18	Heaps	11	M3	W11	FAANG
19	Graphs [Traversal, Shortest Path, MST, Additional]	50	M3	W11	FAANG
20	Dynamic Programming [1D, 2D, Subsequences, LIS, Strings, MCM]	60	M4	W12	FAANG
21	Tries	7	M4	W14	FAANG
22	Strings (Advanced Algo)	9	M4	W14	FAANG
23	Maths	19	M4	W14	FAANG
24	FAANG OA Gap Pack [Blind75 / NeetCode / 2025-26 reports]	45	M3	W11	FAANG
	TOTAL	480			

3b. FAANG OA Gap Pack — Real Interview Gaps

These are **not filler**. Each title is a Blind 75 / NeetCode 150 / 2025–26 OA staple that was missing (or under-covered) on TUF+. Scheduled into your planner from mid-August; finish P0 before Nov mocks.

#	Problem	Diff	Pri	Why / Companies
1	Contains Duplicate	Easy	P0	Warm-up OA / phone screen staple (Blind 75). Hash set $O(n)$. — Amazon, Google, Microsoft
2	Product of Array Except Self	Medium	P0	Extremely common Amazon OA + Meta phone. Prefix×suffix, no division. — Amazon, Meta, Apple
3	Group Anagrams	Medium	P0	Blind 75 / NeetCode 150 core. Sorted-key or count-key bucketing. — Amazon, Meta, Apple
4	Top K Frequent Elements	Medium	P0	Top-K pattern appears across FAANG; heap or bucket $O(n)$. — Amazon, Meta, Google
5	Encode and Decode Strings	Medium	P1	NeetCode classic; tests edge-case thinking (any character). — Google, Meta
6	Container With Most Water	Medium	P0	Tier-1 two-pointer; Meta-heavy per 2025–26 reports. — Meta, Amazon, Google
7	Merge Intervals	Medium	P0	Blind 75 must-know; interval sweep is its own FAANG pattern. — Amazon, Google, Microsoft
8	Meeting Rooms II	Medium	P0	Chronological sweep → peak rooms. Common Meta/Amazon follow-up to Meeting Rooms. — Meta, Amazon, Google
9	Set Matrix Zeroes	Medium	P0	In-place markers; frequent array/matrix round. — Amazon, Microsoft, Apple
10	Permutation in String	Medium	P1	Fixed window + frequency match; OA-friendly. — Microsoft, Amazon
11	Decode String	Medium	P0	Nested $k[\text{body}]$ stack; NeetCode 150 stack expansion. — Google, Amazon, Bloomberg
12	Evaluate Reverse Polish Notation	Medium	P1	Operand stack / postfix; clean stack fluency check. — Amazon, LinkedIn
13	Daily Temperatures	Medium	P0	Monotonic stack poster child; same family as Next Greater. — Amazon, Meta
14	Longest Valid Parentheses	Hard	P1	Hard stack/DP hybrid; screens strong candidates. — Amazon, Google
15	Reorder List	Medium	P0	Middle + reverse + merge; classic multi-step LL. — Meta, Amazon, Microsoft
16	Swap Nodes in Pairs	Medium	P1	Pointer surgery under pressure; frequent phone-screen LL. — Amazon, Microsoft, Bloomberg
17	Invert Binary Tree	Easy	P0	Google lore + actual easy tree fluency check. — Google, Amazon, Apple
18	Same Tree	Easy	P1	Lockstep DFS; builds into Subtree / Symmetric variants. — Amazon, Apple
19	Subtree of Another Tree	Easy	P1	Blind 75; composition of Same Tree. — Amazon, Microsoft
20	Binary Tree Right Side View	Medium	P0	Level-batch BFS; last node per level. — Amazon, Meta, Microsoft
21	Clone Graph	Medium	P0	Blind 75 graph clone with map; Meta/Amazon favorite. — Meta, Amazon, Google
22	Pacific Atlantic Water Flow	Medium	P0	NeetCode graph staple; flood from borders + intersect. — Google, Amazon
23	Number of Connected Components in an Undirected Graph	Medium	P0	DSU counting; pairs with Redundant Connection. — Amazon, Google, LinkedIn
24	Redundant Connection	Medium	P1	First cycle-closing edge; NeetCode graph gap vs Blind 75. — Amazon, Google
25	Graph Valid Tree	Medium	P1	Connected + $n-1$ edges + no cycle. — Google, LinkedIn
26	Network Delay Time	Medium	P0	Shortest path under weights; Google/Amazon graph depth. — Amazon, Google
27	Cheapest Flights Within K Stops	Medium	P0	Bounded hops; common Google/Amazon graph variant. — Google, Amazon
28	Jump Game II	Medium	P0	Blind 75 gap vs Jump Game I; min jumps greedy BFS-by-levels. — Amazon, Google, Microsoft
29	Gas Station	Medium	P0	NeetCode greedy; total gas $\geq$ cost $\Rightarrow$ unique start exists. — Amazon, Google

#	Problem	Diff	Pri	Why / Companies
30	Partition Labels	Medium	P1	Amazon-leaning greedy; last-occurrence extend. — Amazon, Meta
31	Word Break	Medium	P0	Blind 75 DP; dictionary split — OA + onsite staple. — Amazon, Google, Meta
32	Decode Ways	Medium	P0	1/2-digit decode DP; frequent Amazon/Google. — Amazon, Google, Meta
33	House Robber II	Medium	P1	Circular house robber; Blind 75 follow-up. — Amazon, Google
34	Maximal Square	Medium	P1	Grid DP min(up,left,diag)+1; Meta/Google 2D DP. — Google, Meta, Apple
35	Permutations	Medium	P0	Amazon/Microsoft backtracking-heavy (15× average). Must-have. — Amazon, Microsoft, Meta
36	Combination Sum II	Medium	P2	Already partly on TUF; keep explicit OA pack revisit if marked Done only once. — Amazon, Microsoft
37	Find Median from Data Stream	Hard	P0	Two-heap pattern; NeetCode heap expansion; hard but high signal. — Amazon, Google, Microsoft
38	K Closest Points to Origin	Medium	P0	Top-K heap; Amazon OA classic. — Amazon, Meta, Google
39	Task Scheduler	Medium	P0	Max-heap + cooldown frame; Amazon/Meta. — Amazon, Meta
40	Number of 1 Bits	Easy	P1	Hamming weight; Blind 75 bit section. — Amazon, Apple, Microsoft
41	Counting Bits	Easy	P1	dp[i]=dp[i>>1]+(i&1); neat bit+DP combo. — Amazon, Apple
42	Reverse Bits	Easy	P1	Blind 75 bit fluency. — Apple, Amazon
43	Sum of Two Integers	Medium	P1	XOR + carry without +; interview trick question still asked. — Amazon, Microsoft
44	Min Cost Climbing Stairs	Easy	P2	DP warm-up sibling of Climbing Stairs. — Amazon, Google
45	01 Matrix	Medium	P1	Distance to nearest 0; multi-source BFS (you have nearest-1 variant — practice this exact — Amazon, Google)
46	Word Search II	Hard	P1	Hard trie board search; Google/Meta hard round signal. — Google, Amazon, Uber

Dec-ready definition: 480 sheet done (or ≥95%) + OA pack P0 done + 20 mocks + 1 timed OA/week for 6 weeks + 8 STAR stories + 5 SD designs explainable

4. Week-by-Week Daily Planner (TUF+ + OA Pack)

Daily DSA focus names match your paid TUF+ sheet plus the FAANG OA Gap Pack. Sundays are rest/revision. Use Interview Command Center Daily Planner to tick tasks.

Week 1 — Arrays + Basic Maths (from your progress) | Phase M1 | DSA target 35/480 | Ends 2026-08-04

Must-have: Resume updated, 3 startups applied, Tracker setup

Red flags: 0 applications sent

Day	Plan
Thu Jul 30	Setup: Notion tracker, LeetCode profile, resume PDF. DSA (Arrays): Intersection of two sorted arrays, Pascal's Triangle III, Rotate matrix by 90 degrees (3)
Fri Jul 31	DSA (Arrays): Two Sum, 3 Sum, 4 Sum (3). Core CS: OS Ch1 — What is OS, Types
Sat Aug 1	DSA (Arrays): Kadane's Algorithm — Maximum Subarray Sum, Best Time to Buy and Sell Stock (single transaction), Next Permutation (3). Apply: Better internship (deadline Aug 9)
Sun Aug 2	DSA (Arrays): Majority Element-II, Find the repeating and missing number, Count Inversions (3). Core CS: OS Ch2 — Process Management
Mon Aug 3	REST DAY — Review week's problems, update portfolio README
Tue Aug 4	DSA (Arrays): Reverse Pairs, Merge two sorted arrays without extra space, Count number of odd digits in a number (3). Apply: GharPayy (deadline Aug 13), Singularium (Aug 15)

Week 2 — Basic Maths+ (from your progress) | Phase M1 | DSA target 52/480 | Ends 2026-08-11

Must-have: Better/GharPayy applied, OS Ch1-2 done

Red flags: Skipping DSA 3+ days

Day	Plan
Wed Aug 5	DSA (Basic Maths): Return the Largest Digit in a Number, Check if the Number is Armstrong, Check for Perfect Number (3). Core CS: DBMS Ch1 — ER Model
Thu Aug 6	DSA (Basic Maths): Check for Prime Number, Count of Prime Numbers till N, GCD of Two Numbers (3)
Fri Aug 7	DSA (Basic Maths): LCM of two numbers, Divisors of a Number, Count of odd numbers in array (3). Apply: BITCS (deadline Aug 14)
Sat Aug 8	DSA (Basic Arrays): Check if the Array is Sorted I, Reverse an array (2). Core CS: DBMS Ch2 — Normalization
Sun Aug 9	DSA (Basic Hashing): Highest Occurring Element in an Array, Second Highest Occurring Element, Sum of Highest and Lowest Frequency (3). Mock: 1 easy LC timed (25 min)
Mon Aug 10	Apply: Better internship LAST DAY. REST — Revise sorting algorithms on paper. Apply: Better internship LAST DAY
Tue Aug 11	DSA (Basic Strings): Reverse a String II, Palindrome Check, Largest Odd Number in a String (3). LinkedIn profile optimization

Week 3 — Basic Strings+ (from your progress) | Phase M1 | DSA target 71/480 | Ends 2026-08-18

Must-have: Binary Search templates locked

Red flags: No BS practice

Day	Plan
Wed Aug 12	DSA (Basic Strings): Longest Common Prefix, Isomorphic String, Rotate String (3). Core CS: OS Ch3 — Scheduling
Thu Aug 13	DSA (Basic Strings): Valid Anagram, Sort Characters by Frequency, Print Name N times using Recursion (3)
Fri Aug 14	DSA (Basic Recursion): Print 1 to N using Recursion, Print N to 1 using Recursion (2). Apply: GharPayy LAST DAY
Sat Aug 15	DSA (Basic Recursion): Sum of first N numbers using Recursion, Factorial of a Number using Recursion, Reverse an array using Recursion, Check if a String is a Palindrome using Recursion (4). Apply: BITCS LAST DAY
Sun Aug 16	DSA (Basic Recursion): Fibonacci Number using Recursion, Selection Sort, Bubble Sort (3). Apply: Singularium LAST DAY
Mon Aug 17	REST — Revise all BS templates (lower bound, on answers)
Tue Aug 18	DSA (Sorting): Insertion Sorting, Merge Sorting, Quick Sorting, Sorting Algorithms — Practice set 1 (4)

Week 4 — Sorting + FAANG OA Pack (from your progress) | Phase M1 | DSA target 80/480 | Ends 2026-08-25

Must-have: Mock #1 done, TCS NextStep registered

Red flags: No mock interviews

Day	Plan
Wed Aug 19	DSA (Sorting): Sorting Algorithms — Practice set 2, Contains Duplicate, Product of Array Except Self (3). Core CS: CN Ch1 — OSI Model
Thu Aug 20	DSA (FAANG OA Pack): Group Anagrams, Top K Frequent Elements (2)
Fri Aug 21	DSA (FAANG OA Pack): Encode and Decode Strings, Container With Most Water, Merge Intervals (3). Apply: Accredian (deadline Aug 19)
Sat Aug 22	DSA (FAANG OA Pack): Meeting Rooms II (1). Core CS: CN Ch2 — TCP/IP, HTTP
Sun Aug 23	Mock Interview #1 (Pramp/Interviewing)
Mon Aug 24	REST — Update Notion tracker. Count: should be ~140/480
Tue Aug 25	Apply: Integral Solution (deadline Aug 24), Almanet (Aug 23)

Week 5 — FAANG OA Pack (from your progress) | Phase M2 | DSA target 97/480 | Ends 2026-09-01

Must-have: Month 1 complete, ~35 companies eligible

Red flags: Behind on recursion

Day	Plan
Wed Aug 26	DSA (FAANG OA Pack): Set Matrix Zeroes, Permutation in String, Decode String (3). Core CS: OOP Ch1 — Classes
Thu Aug 27	DSA (FAANG OA Pack): Evaluate Reverse Polish Notation, Daily Temperatures (2). Apply: Morfiction (deadline Aug 27)
Fri Aug 28	DSA (FAANG OA Pack): Longest Valid Parentheses, Reorder List, Swap Nodes in Pairs (3). Apply: DocStox (deadline Aug 27)
Sat Aug 29	DSA (FAANG OA Pack): Invert Binary Tree, Same Tree (2). Core CS: OOP Ch2 — Inheritance
Sun Aug 30	DSA (FAANG OA Pack): Subtree of Another Tree, Binary Tree Right Side View, Clone Graph (3). PHASE 2 STARTS. Mock #2 (service-based level)
Mon Aug 31	REST — Month 1 complete! Eligible for ~35 companies now
Tue Sep 1	DSA (FAANG OA Pack): Pacific Atlantic Water Flow, Number of Connected Components in an Undirected Graph, Redundant Connection, Graph Valid Tree (4). TCS NQT registration check

Week 6 — FAANG OA Pack + Binary Search (from your progress) | Phase M2 | DSA target 114/480 | Ends 2026-09-08

Must-have: LL fundamentals done

Red flags: No Internshala applications

Day	Plan
Wed Sep 2	DSA (FAANG OA Pack): Network Delay Time, Cheapest Flights Within K Stops, Jump Game II (3). Core CS: DBMS Ch3 — SQL Queries
Thu Sep 3	DSA (FAANG OA Pack): Gas Station, Partition Labels, Search X in sorted array (3)
Fri Sep 4	DSA (Binary Search): Lower Bound, Upper Bound (2). Apply: 5 more Internshala listings
Sat Sep 5	DSA (Binary Search): Search insert position, Floor and Ceil in Sorted Array, First and last occurrence (3). Core CS: OS Ch4 — Memory Mgmt
Sun Sep 6	DSA (Binary Search): Search in rotated sorted array-I, Search in rotated sorted array-II (2). Mock #3
Mon Sep 7	REST — Revise LL pointer techniques
Tue Sep 8	DSA (Binary Search): Find minimum in Rotated Sorted Array, Find out how many times the array is rotated, Single element in sorted array, Find square root of a number (4)

Week 7 — Binary Search (from your progress) | Phase M2 | DSA target 131/480 | Ends 2026-09-15

Must-have: ~220/480 path

Red flags: Burnout / skipped mocks

Day	Plan
Wed Sep 9	DSA (Binary Search): Find Nth root of a number, Find the smallest divisor, Koko eating bananas (3). Core CS: CN Ch3 — DNS, DHCP
Thu Sep 10	DSA (Binary Search): Minimum days to make M bouquets, Aggressive Cows, Book Allocation Problem (3)
Fri Sep 11	DSA (Binary Search): Find peak element, Median of 2 sorted arrays, Kth element of 2 sorted arrays, Minimize Max Distance to Gas Station (4)
Sat Sep 12	DSA (Binary Search): Split array - largest sum, Find row with maximum 1's (2). Apply: Cognizant GenC check
Sun Sep 13	DSA (Binary Search): Search in a 2D matrix, Search in 2D matrix - II, Find Peak Element - II (3). Mock #4 (full startup interview — DSA + project discussion)
Mon Sep 14	REST — Should be ~220/480. Review all patterns
Tue Sep 15	DSA (Binary Search): Matrix Median, Binary Search — Practice set 1 (2)

Week 8 — Binary Search+ (from your progress) | Phase M2 | DSA target 141/480 | Ends 2026-09-22

Must-have: 8 mocks, 25+ apps, CN basics

Red flags: Less than 15 applications

Day	Plan
Wed Sep 16	DSA (Binary Search): Binary Search — Practice set 2, Basic Hashing — Theory, Longest Consecutive Sequence in an Array (3). Core CS: OOP Ch3 — Polymorphism
Thu Sep 17	DSA (Hashing): Longest subarray with sum K, Count subarrays with given sum (2). System Design: Intro (YouTube — Gaurav Sen)
Fri Sep 18	DSA (Hashing): Count subarrays with given xor K, Hashing — Practice set 1 (2). Apply: TCS NQT if open
Sat Sep 19	DSA (Hashing): Hashing — Practice set 2, Hashing — Practice set 3, Pow(x,n) (3). Core CS: DBMS Ch4 — Indexing
Sun Sep 20	Mock #5 + Mock #6 (2 mocks this week — interview ready push)
Mon Sep 21	REST — Should be ~250/480. INTERVIEW READY checkpoint!
Tue Sep 22	DSA (Recursion): Generate Parentheses, Power Set, Check if there exists a subsequence with sum K (3)

Week 9 — Recursion + Linked List (from your progress) | Phase M2→M3 | DSA target 157/480 | Ends 2026-09-29

Must-have: Phase 2 complete, 60+ companies eligible

Red flags: No tree practice

Day	Plan
Wed Sep 23	DSA (Recursion): Count all subsequences with sum K, Combination Sum (2). Apply: 10 companies this week
Thu Sep 24	DSA (Recursion): Combination Sum II, Subsets I, Subsets II (3)
Fri Sep 25	DSA (Recursion): Combination Sum III, Letter Combinations of a Phone Number, Palindrome partitioning, Word Search (4). System Design: URL Shortener
Sat Sep 26	DSA (Recursion): N Queen, Rat in a Maze, M Coloring Problem, Sudoku Solver (4). Core CS: OS Ch5 — Deadlocks
Sun Sep 27	Mock #7 (service-based: TCS/Wipro pattern)
Mon Sep 28	REST — Phase 2 complete! Eligible for 60+ companies
Tue Sep 29	DSA (Recursion): Recursion — Practice set 1, Recursion — Practice set 2, Introduction to Singly LinkedList (3)

Week 10 — Linked List (from your progress) | Phase M3 | DSA target 173/480 | Ends 2026-10-06

Must-have: Microsoft applied

Red flags: No FAANG apps

Day	Plan
Wed Sep 30	DSA (Linked List): Traversal in Linked List, Deletion in Linked List (2). PHASE 3 STARTS. SD: Rate Limiter
Thu Oct 1	DSA (Linked List): Insertion in Linked List, Deletion of the head of LL, Deletion of the tail of Linked List, Deletion of the Kth element of Linked List (4). Apply: Microsoft SWE Intern (rolling)
Fri Oct 2	DSA (Linked List): Delete the element with value X, Insertion at the head of Linked List, Insertion at the tail of Linked List (3). Core CS: CN Ch4 — Routing
Sat Oct 3	DSA (Linked List): Insertion at the Kth position of Linked List, Insertion before the value X in Linked List, Introduction to Doubly LL (3)
Sun Oct 4	Mock #9 (FAANG easy-medium)
Mon Oct 5	REST — Revise tree traversals + BST properties
Tue Oct 6	DSA (Linked List): Deletion in Doubly LL, Insertion in DLL, Convert Array to Doubly Linked List, Delete head of Doubly Linked List (4). SD: Notification System

Week 11 — Linked List (from your progress) | Phase M3 | DSA target 186/480 | Ends 2026-10-13

Must-have: Graph templates, OA pack started

Red flags: Skipping SD

Day	Plan
Wed Oct 7	DSA (Linked List): Delete Tail of Doubly Linked List, Delete Kth Element of Doubly Linked List, Removing given node in Doubly Linked List (3). Core CS: DBMS Ch5 — Transactions
Thu Oct 8	DSA (Linked List): Insert node before head in Doubly Linked List, Insert node before tail in Doubly Linked List, Insert node before (kth node) in Doubly Linked List (3)
Fri Oct 9	DSA (Linked List): Insert before given node in Doubly Linked List, Add two numbers in Linked List, Segregate odd and even nodes in Linked List, Sort a Linked List of 0's 1's and 2's (4). Apply: Flipkart check
Sat Oct 10	DSA (Linked List): Remove Nth node from the back of the LL, Reverse a LL, Add one to a number represented by LL (3). SD: Chat Application
Sun Oct 11	Mock #10 (FAANG medium)
Mon Oct 12	REST — Should be ~340/480
Tue Oct 13	DSA (Linked List): Find Middle of Linked List, Delete the middle node in LL, Check if LL is palindrome or not (3)

Week 12 — Linked List + Bit Manipulation (from your progress) | Phase M3→M4 | DSA target 202/480 | Ends 2026-10-20

Must-have: Microsoft applied, Amazon alert, SD #3

Red flags: No system design practice

Day	Plan
Wed Oct 14	DSA (Linked List): Find the intersection point of Y LL, Detect a loop in LL, Find the starting point in LL (3)
Thu Oct 15	DSA (Linked List): Length of loop in LL, Reverse LL in group of given size K, Rotate a LL (3). Core CS: OOP Ch4 — Design Patterns
Fri Oct 16	DSA (Linked List): Merge two Sorted Lists, Flattening of LL, Sort LL, Clone a LL with random and next pointer (4). SD: Parking Lot
Sat Oct 17	DSA (Linked List): Delete all occurrences of a key in DLL, Remove duplicates from sorted DLL, Linked List — Practice set 1 (3). Apply: Swiggy/Zomato
Sun Oct 18	Mock #11 + Mock #12
Mon Oct 19	REST — Eligible for 75+ companies
Tue Oct 20	DSA (Bit Manipulation): Introduction to Bits and Tricks, Minimum Bit Flips to Convert Number, Single Number - I (3). PHASE 4 STARTS

Week 13 — Bit Manipulation + Greedy (from your progress) | Phase M4 | DSA target 216/480 | Ends 2026-10-27

Must-have: DP patterns, OA pack P0 half done

Red flags: DP avoidance

Day	Plan
Wed Oct 21	DSA (Bit Manipulation): Single Number - II, Single Number - III, Divide two numbers without multiplication and division (3)
Thu Oct 22	DSA (Bit Manipulation): Power Set Bit Manipulation, XOR of numbers in a given range, Bit Manipulation — Practice set 1 (3). SD: Instagram Feed
Fri Oct 23	DSA (Greedy): Assign Cookies, Lemonade Change, Jump Game - I (3). Core CS: OS Ch6 — Virtual Memory
Sat Oct 24	DSA (Greedy): Shortest Job First, Job sequencing Problem (2). Apply: Razorpay, PhonePe
Sun Oct 25	Mock #13 (FAANG hard DP)
Mon Oct 26	REST — Should be ~400/480
Tue Oct 27	DSA (Greedy): N meetings in one room, Non-overlapping Intervals, Insert Interval (3). SD: YouTube/Twitter

Week 14 — Greedy + Sliding Window (from your progress) | Phase M4 | DSA target 229/480 | Ends 2026-11-03

Must-have: Phase 4 complete, 85+ eligible

Red flags: No FAANG follow-ups

Day	Plan
Wed Oct 28	DSA (Greedy): Minimum number of platforms required for a railway, Valid Paranthesis Checker, Candy (3). Core CS: DBMS Ch6 — ACID deep dive
Thu Oct 29	DSA (Greedy): Greedy Algorithms — Practice set 1, Sliding Window / 2 Pointer — Pattern and Template Theory (2). Apply: Google/other FAANG
Fri Oct 30	DSA (Sliding Window): Maximum Points You Can Obtain from Cards, Longest Substring Without Repeating Characters (2). SD: Uber/Lyft design
Sat Oct 31	DSA (Sliding Window): Max Consecutive Ones III, Fruit Into Baskets, Longest Substring With At Most K Distinct Characters (3). Mock #14
Sun Nov 1	DSA (Sliding Window): Longest Repeating Character Replacement, Minimum Window Substring, Number of Substrings Containing All Three Characters (3). Mock #15 (full FAANG loop simulation)
Mon Nov 2	REST — Phase 4 complete! Eligible for 85+ companies
Tue Nov 3	PHASE 5 STARTS. Behavioral: 8 STAR stories mapped to Amazon LPs

Week 15 — Sliding Window + Stack/Queues (from your progress) | Phase M5 | DSA target 241/480 | Ends 2026-11-10

Must-have: Revision batches, OA pack complete

Red flags: Contest avoidance

Day	Plan
Wed Nov 4	DSA (Sliding Window): Binary Subarrays With Sum, Count number of Nice subarrays, Sliding Window / 2 Pointer — Practice set 1 (3). SD: Design WhatsApp
Thu Nov 5	DSA (Stack/Queues): Implementation using different DS, Implement Stack using Arrays, Implement Queue using Arrays (3). Core CS: Full OS revision
Fri Nov 6	DSA (Stack/Queues): Implement Stack using Queue, Implement Queue using Stack, Implement stack using Linkedlist (3). Apply: Any remaining FAANG
Sat Nov 7	DSA (Stack/Queues): Implement queue using Linkedlist, Balanced Paranthesis, Next Greater Element (3). Core CS: Full DBMS revision
Sun Nov 8	Mock #16 + Mock #17 (back-to-back FAANG simulation)
Mon Nov 9	REST — Should be ~450/480
Tue Nov 10	Follow PDF plan

Week 16 — Stack/Queues + Binary Trees (from your progress) | Phase M5 | DSA target 480/480 | Ends 2026-11-17

Must-have: 480/480, 20+ mocks, LLD Part 1, FAANG OA pack done

Red flags: Less than 40 applications

Day	Plan
Wed Nov 11	DSA (Stack/Queues): Next Greater Element - 2, Asteroid Collision, Sum of Subarray Minimums, Sum of Subarray Ranges, Remove K Digits, Implement Min Stack (6). SD: Design Google Maps
Thu Nov 12	DSA (Stack/Queues): Sliding Window Maximum, Trapping Rainwater, Largest rectangle in a histogram, Maximum Rectangles, Stock span problem, Celebrity Problem (6). Core CS: Full CN revision
Fri Nov 13	DSA (Stack/Queues): LRU Cache, LFU Cache, Stack / Queues — Practice set 1, Introduction to Binary Trees, Inorder Traversal, Preorder Traversal (6). Behavioral: 20 common FAANG questions
Sat Nov 14	DSA (Binary Trees): Postorder Traversal, Level Order Traversal, Pre, Post, Inorder in one traversal, Check if two trees are identical or not, Diameter of Binary Tree (5). SD: Design Netflix
Sun Nov 15	Mock #18 + Mock #19 + Mock #20 (triple mock day prep)
Mon Nov 16	REST — 480/480 COMPLETE!
Tue Nov 17	DSA (Binary Trees): Maximum path sum, Check for symmetrical BTs, Zig Zag or Spiral Traversal (3)

Week 17 — FAANG Ready — Mock Marathon | Phase M5 | DSA target 480/480 | Ends 2026-11-24

Must-have: Mock marathon

Red flags: No networking

Day	Plan
Wed Nov 18	SD: Design Slack. Mock #21 (Google style)
Thu Nov 19	Core CS: Rapid fire quiz (100 Q). Mock #22 (Amazon style)
Fri Nov 20	Mock #23 (Microsoft style)
Sat Nov 21	Mock #24 (Meta style). LinkedIn optimization
Sun Nov 22	Mock #25 (Apple style)
Mon Nov 23	REST — Review all mock feedback
Tue Nov 24	Apply: Any final openings

Week 18 — Binary Trees (from your progress) | Phase M5 | DSA target 480/480 | Ends 2026-11-30

Must-have: 1+ interview pipeline

Red flags: No callbacks

Day	Plan
Wed Nov 25	DSA (Binary Trees): Boundary Traversal, Vertical Order Traversal, Top View of BT (3)
Thu Nov 26	DSA (Binary Trees): Bottom view of BT, Right/Left View of BT, Print root to leaf path in BT (3). SD: Design Dropbox
Fri Nov 27	DSA (Binary Trees): LCA in BT, Maximum Width of BT, Print all nodes at a distance of K in BT (3)
Sat Nov 28	DSA (Binary Trees): Minimum time taken to burn the BT from a given Node, Count total nodes in a complete BT, Requirements needed to construct a unique BT (3)
Sun Nov 29	DSA (Binary Trees): Construct a BT from Preorder and Inorder, Construct a BT from Postorder and Inorder, Serialize and De-serialize BT (3). Mock #26 — Full loop simulation
Mon Nov 30	REST — CELEBRATE! FAANG READY

December Buffer (Weeks 19–20)

Dec 1–14: 2 revision problems + 1 SD practice daily; keep interview pipeline warm. Dec 15–28: 1 timed problem + follow-ups; target 1+ offer in hand. DSA target remains 480/480.

5. Core CS Fundamentals — Basics to Advanced

1 hour/day Mon–Sat alongside DSA. Alternate OS/DBMS and CN/OOP; System Design from Phase 3.

Subject	Basics	Intermediate	Advanced	Resource
OS	What is OS, Types, Process	Scheduling, Memory Mgmt	Deadlocks, Virtual Memory	Gate Smashers
DBMS	ER Model, Normalization	SQL, Indexing, Joins	Transactions, ACID, Concurrency	Gate Smashers
CN	OSI, TCP/IP, HTTP	DNS, DHCP, Routing	Congestion, Security, CDN	Neso Academy
OOP	Classes, Encapsulation	Inheritance, Polymorphism	Design Patterns	GFG
System Design	—	URL Shortener, Rate Limiter	Instagram, Uber, Netflix	Gaurav Sen / Alex Xu
Aptitude	Numbers, Percentages	Time & Work, Probability	Permutations, Series	Preplnsta

- Mon/Wed/Fri: OS or DBMS (alternate weeks) — 30 min lecture + 30 min notes
- Tue/Thu: Computer Networks or OOP — 30 min lecture + 30 min notes
- Saturday: System Design (Phase 3+) — 1 design problem (45 min) + review
- Sunday: REST or 15-min flashcard revision of the week's CS topics

6. Company Eligibility & Application Windows

CGPA 8.27 ✓ | 5th Sem (Pre-final) ✓ | CS ✓ | No backlogs ✓ | Full-stack portfolio ✓ | 2028 batch ✓

A. Startups — Apply Immediately

Company	Role	Deadline	Mode	Match
Better	SWE Intern	Aug 9, 2026	Remote	95%
GharPay	Full Stack Intern	Aug 13, 2026	Bangalore	98%
BITCS	SWE Intern	Aug 14, 2026	Remote	95%
Singularium	Full Stack Intern	Aug 15, 2026	Bangalore	90%
Accredian	Full Stack Intern	Aug 19, 2026	Remote	98%
Almanet	Full Stack Intern	Aug 23, 2026	Remote	92%
Integral Solution	Full Stack Intern	Aug 24, 2026	Remote	85%
Morfiction (SnapX)	Founding FS Intern	Aug 27, 2026	Remote	99%
DocStox	Full Stack Intern	Aug 27, 2026	Remote	97%

B. Service-Based — You Clear Cutoffs

Company	Min CGPA	Eligible?	Window	CTC
TCS NQT/Ninja	6.0	YES	Aug–Sep 2026	3.36–7 LPA
TCS Digital / Prime	6.0 / 7.0	YES	With NQT	7–12 LPA
Infosys DSE / SP	6.0 / 7.0	YES	Sep–Oct 2026	3.6–9.5 LPA
Wipro Elite NLTH	6.0	YES	Aug–Oct 2026	3.5–6.5 LPA
Cognizant GenC	6.0	YES	Sep–Oct 2026	4–6.75 LPA
Accenture	6.5	YES	Campus / off-campus	4.5–6.5 LPA

C. Product / FAANG — Track B (Oct–Dec)

- Microsoft SWE Intern — rolling; apply early in Phase 3.
- Amazon SDE Intern — watch Aug–Oct postings; OA practice from Week 11.
- Google / Meta / Apple — Phase 4–5 once DP + mocks are strong.
- Product: Flipkart, Swiggy, Razorpay, PhonePe, CRED — apply as OAs open.
- Live openings auto-sync in Interview Command Center via Greenhouse / Lever / Ashby / Remotive + Internshala / Wellfound / Unstop / LinkedIn hubs.

7. Tracking Sheets & Daily Routine

- **DSA Tracker:** Mark Done / In Progress / Revisit in Interview Command Center — 480 total (TUF+ 435 + OA pack 45).
- **Daily Planner:** Tick DSA, Core CS, Tech Revision, Application, English for each day.
- **Checkpoints:** Weekly 'Am I On The Right Path?' page compares DSA actual vs target.
- **Companies:** Status pipeline (Not Applied → Applied → OA → Interview → Offer).
- **Notion (optional):** Mirror weekly themes; ICC is source of truth for counts.

Suggested weekday block (college evenings)

Time	Block	Duration
6:00–7:00 PM	DSA (2–4 TUF+ problems)	60–90 min
7:00–8:00 PM	Core CS lecture + notes	60 min
8:00–8:30 PM	Dinner / break	30 min
8:30–9:15 PM	Tech stack / portfolio OR applications	45 min
9:15–9:45 PM	English / explain-aloud / STAR	30 min
Sunday	REST + light revision + tracker update	—

8. Resources, Tips & Success Metrics

- **DSA:** TUF+ Basic to Advanced (435) + FAANG OA Gap Pack (45) = 480. LeetCode for contests/timed OAs.
- **Core CS:** Gate Smashers (OS/DBMS), Neso Academy (CN), GFG OOP, Preplnsta aptitude.
- **System Design:** Gaurav Sen, Alex Xu Vol 1 (lite for intern).
- **Mocks:** Pramp, Interviewing.io, peer mocks; aim 20+ by late November.
- **Sep success:** ~230/480 + 8 mocks + 25+ apps + Core CS basics = Interview Ready.
- **Dec success:** 480/480 + SD + 20+ mocks + FAANG/product pipeline = FAANG Ready.

9. College Timetable — Realistic Daily Schedule

Protect lecture hours; treat evenings as the interview job. 4+ evening hours $\times$ 6 days $\approx$ 24h/week — enough to finish TUF+ and Core CS if you show up. Skip doom-scrolling after 6 PM. One skipped DSA day is recoverable; three in a row is a red flag (see §16).

10. Complete Syllabus — Phase-by-Phase (DSA Priority)

Phase	DSA (P0)	Core / Other	Hrs/wk DSA
P1 Jul 30–Aug 28	Basics + Sorting + Arrays + BS + Hashing → ~120	DS + DBMS basics, resume, 15 startup apps	14h
P2 Aug 29–Sep 28	Recursion → LL → Bit → Greedy → SW → Stack	DB + OOP, 25+ apps	14h
P3 Sep 29–Oct 28	BST + Heaps + Graphs → ~312	SD intro, Amazon/Microsoft apps	14h
P4 Oct 29–Nov 28	DP + Tries + Strings Adv + Maths → ~370+	SD intermediate, FAANG OAs, 12 mocks	14h
P5 Nov 29–Dec 28	Finish 480 + full revision	Advanced SD, mock marathon, offers	12h

Topic checklists (track with checkboxes in ICC / Notion)

- **LLD:** SOLID, UML, Creational/Structural/Behavioural patterns, concurrency, DI, interview problems 1–3.
- **OOP:** Principles → advanced features → relationships → design & lifecycle.
- **CN:** Modules 1–15 (foundations through situation-based).
- **DBMS:** ER → SQL → NoSQL → transactions → indexing → distributed / security / warehousing.

11. Tech Stack Revision Schedule (Your ChaiCode Path)

You already build with this stack in production. Revision = interview fluency — explain each topic in 2 minutes.

Week	Focus	Interview Q
W1–2	DNS, TCP/IP, HTTP, Client–Server	What happens when you type google.com?
W3–4	JS: Closures, Promises, Event Loop	Event loop with microtask example
W5–6	TypeScript: Generics, Interfaces	Why TypeScript for large apps?
W7–8	Node.js, Express, REST	Design a rate-limited REST API
W9–10	Auth: JWT, OAuth, RBAC	Walk through login + refresh tokens
W11–12	React Hooks, memoization, Context	useMemo vs useCallback?
W13–14	Next.js SSR/SSG/ISR, Server Actions	When SSR over CSR?
W15–16	WebSockets / Socket.io / SSE	Polling vs WebSocket?
W17–18	Redis, Kafka, rate limiting	Build a rate limiter — approach?
W19–20	Docker, CI/CD, AWS, monitoring	How do you deploy ShipFlow?

12. Best Platforms + Application Strategy

Platform	Best For	Action	Cadence
Internshala	Indian startups, WFH	Apply within 48h	Daily 9 AM
LinkedIn Jobs	All + referrals	Alerts: intern + full stack	Daily
Wellfound	Funded startups	Apply ~10/week	Mon + Thu
Unstop	Hackathons → hiring	1 hackathon/month	Weekly
TCS NextStep	NQT + internships	Register profile NOW	Weekly
Greenhouse/Lever boards	Product companies	Synced in ICC live	Auto every 6h
Remotive	Remote SWE	Filter junior/intern	Synced in ICC

13. Master Company List — 180+ Targets

The full 180+ company list (Batches A–F + Live hubs) lives in Interview Command Center → Companies, seeded from your planner and refreshed with real ATS openings (Greenhouse, Lever, Ashby) plus Remote and platform hubs (Internshala, Wellfound, Unstop, LinkedIn). Prioritize High matchScore + open roles + deadlines ≤ 14 days.

- Batch A–B: FAANG + top product (Microsoft, Amazon, Razorpay, CRED, ...)
- Batch C–D: Product / unicorns with Greenhouse/Lever wiring where available
- Batch E–F: Broader service + startup watchlist with Wellfound/Internshala search URLs
- LiveHub cards: always-open boards — refresh often; apply from the live listing page

14. Interview Prep by Topic — What They Actually Ask

Prep plan per company type

Startup (best bet NOW)

- Lead with ShipFlow AI or Relvion AI — live demo.
- Expect: architecture walkthrough + 1 LC medium from TUF+ Arrays/Hashing/BT.
- Stack: Next.js SSR, PostgreSQL vs MongoDB, JWT auth flow.
- Show GitHub commits, not just finished READMEs.

Service-based (TCS / Wipro / Infosys)

- Aptitude 30 min/day from Month 2 (Preplnsta).
- DSA: Arrays, Strings, basic SQL — easy–medium from early TUF+ steps.
- Core CS: 20 must-know Qs per subject.
- HR: 2-min Tell me about yourself + strengths/weaknesses.

FAANG / Product (Month 3+)

- OA: 2–3 medium in 90 min — HackerRank / AMCAT practice.
- Phone: 1 medium + behavioral (Amazon LPs, Googleyness).
- Onsite: 3–4 DSA + 1 SD lite + 1 behavioral.
- 8 STAR stories from projects; Amazon: map to 14 Leadership Principles.

15. English & Communication — Fluency Guide

Level	Required For	Target	By
Basic	Service HR	Already there	—
Conversational	Startup tech + HR	Clear over perfect	Aug 15
Professional	Product / FAANG	Explain complex ideas	Oct 1
Fluent	US remote / clients	Confident depth	Dec

Daily 30-min communication (evening slot)

- Mon: Explain 1 DSA solution out loud (record).
- Tue: Read 1 engineering blog aloud.
- Wed: 2-min project pitch (ShipFlow → Relvion → EdinForm).
- Thu: STAR story — 3 min max.
- Fri: Watch 1 mock interview; repeat answers.
- Sat: Pramp mock OR explain one SD problem out loud.
- Sun: REST — optional podcast while walking.

16. Am I On The Right Path? — Weekly Checkpoints

Compare your ICC DSA done count to the target each Sunday. Red flags mean course-correct that week — cut optional work, not DSA + applications.

Week	Date	DSA Target	Must-Have	Red Flag
W1	2026-08-04	35/480	Resume updated, 3 startups applied, Tracker setup	0 applications sent
W2	2026-08-11	52/480	Better/GharPayy applied, OS Ch1-2 done	Skipping DSA 3+ days
W3	2026-08-18	71/480	Binary Search templates locked	No BS practice
W4	2026-08-25	80/480	Mock #1 done, TCS NextStep registered	No mock interviews
W5	2026-09-01	97/480	Month 1 complete, ~35 companies eligible	Behind on recursion
W6	2026-09-08	114/480	LL fundamentals done	No Internshala applications
W7	2026-09-15	131/480	~220/480 path	Burnout / skipped mocks
W8	2026-09-22	141/480	8 mocks, 25+ apps, CN basics	Less than 15 applications
W9	2026-09-29	157/480	Phase 2 complete, 60+ companies eligible	No tree practice
W10	2026-10-06	173/480	Microsoft applied	No FAANG apps
W11	2026-10-13	186/480	Graph templates, OA pack started	Skipping SD
W12	2026-10-20	202/480	Microsoft applied, Amazon alert, SD #3	No system design practice
W13	2026-10-27	216/480	DP patterns, OA pack P0 half done	DP avoidance
W14	2026-11-03	229/480	Phase 4 complete, 85+ eligible	No FAANG follow-ups
W15	2026-11-10	241/480	Revision batches, OA pack complete	Contest avoidance
W16	2026-11-17	480/480	480/480, 20+ mocks, LLD Part 1, FAANG OA pack done	Less than 40 applications
W17	2026-11-24	480/480	Mock marathon	No networking
W18	2026-11-30	480/480	1+ interview pipeline	No callbacks
W19	2026-12-14	480/480	1+ interview pipeline active, SD #10, FAANG OA pack done	No interview callbacks at all
W20	2026-12-28	480/480	Offer negotiation ready	Idle December

Key milestones: W8 (~230/480) = Startup/Service Interview Ready · W16 (480/480) = Sheet + OA pack complete · W18–20 = Offer season & maintenance.

Generated from your Interview Command Center current plan (TUF+ 435 + FAANG OA Gap Pack 45 = 480; Jul–Dec 2026). Open the app for live company sync and day-to-day tracking.
